

22nd EBCC conference
Bird Numbers 2022
4 to 8 April 2022, Lucerne, Switzerland

The PECBMS workshop

Monday 4 April 2022, 2.30–5.30 PM

Agenda points

1. Report on the progress of the PECBMS (60 min)

Alena Klvaňová: Welcome, a summary of the PECBMS activities 2019–2021

Eva Šilarová: Technical update (data revision, new programs, online tools)

Anna Gamero: Presentation of the new site-level online tool

Petr Voříšek: The concept of the International Census Plots (ICP), experience from the pilot year, and plans for the future

2. Time for coordinators: updates and questions (60 min)

3. Presentations on research outputs and future development (60 min)

Karine Princé: Embedding the FBI into the CAPRI model for the European Commission and projects mobilizing the French BBS data (Natura 2000 assessment, data combination with opportunistic records, etc.)

Fränzi Korner-Nievergelt & Thomas Sattler: The problem of disappearing or newly occurring species in multi-species indices and how to resolve it

Enya O'Reilly, Simon Butler: Relative habitat use (RHU) metric accurately quantifies species' habitat association and degree of specialization

Henk Sierdsema, Christian Kampichler: Distribution modeling with SDMmaps (an update about modeling techniques available for CBM coordinators)
